## Professional experiences

### February 2012 - Today, Freelance Developer – Berlin, Germany<sup>1</sup>

Development and tutoring for multiple clients in USA, Germany and Canada.

Helping people with their dream or existing web applications from top to bottom.

### March 2011 - Feb 2012, Paattle - Vancouver, Canada / Zürich, Switzerland<sup>2</sup>

Modeling, development, maintenance and lead coordination on the Paattle project. Ruby on Rails, MySQL, Redis, Sphinx, and other technologies were used on this project.

I went from leading a team of 3 developers/designers to design, implement, launch and maintain the social platform from the ground up – to General Manager, responsible of all North American operations.

### October 2009 - March 2011, E-xact Transactions Ltd. - Vancouver, Canada<sup>3</sup>

Maintenance of an online Real-time Payment Manager. Continuous development of a high-availability software back-end application. Use of Ruby on Rails, MySQL and deployment tools.

### April 2008 - July 2009, Spidart - Lyon, France

Modeling, coordination, and development of a commercial-type website, with a scaling perspective (100 000 clicks a day). Ruby on Rails and other state-of-the-art technologies. This was my first experience in software architecture/project management. I led a team of 3 developers/designers into building the social platform from the ground up. The project is still available for demonstration if needed.

### June 2007 - March 2008, Pierlis - Paris, France<sup>4</sup>

Web application development with Ruby on Rails for various clients including press, radio, etc ... (Le Nouvel Observateur<sup>5</sup>, RTL<sup>6</sup> ...). During this internship, I developed my customer relationship skills in various environments.

## Education

**2007** BTS Info de Gestion (CS Undergraduate Equivalent) – EPSI Lyon, France

**2005** BAC S, Math Spec – Champagnat, Saint-Symphorien-Sur-Coise, France

**1990-2005** Primary/Secondary education in UK, USA, France, South Africa

## Skills

Object Oriented development mastery, as well as MVC frameworks and RESTful design.

Web technologies mastery, and major TCP/IP protocols. Over 10 years of experience of using HTML5, CSS/SASS on a daily basis. 1 year of experience with CoffeeScript, Backbone and authentication protocols like OAuth

Numerous technology approaches such as AJAX, JavaScript, PHP, Ruby, .NET, and useful knowledge in the UNIX/Linux world.

I am known to have a strong adaptability to most situations. I enjoy working with a team and managing/working on projects from A to Z, which is why I prefer small companies. Being strongly involved in a project is crucial to me.

## Hobbies

Kyokushin Karate practitioner, music lover, surfing, snowboarding. Lived in USA (CT, CA), UK, South Africa, and many places in France. Love to travel around our incredible globe.
